Design Guide

John Dennis Constructions

www.jdcindia.com · Built for Life

01 LOGO · THE FAMILY

Six keystones, one family.

Two courses of three, the upper course stepped by one unit, as a mason would lay them: a mark built, not drawn. Every lockup is set on that unit, x. Always use the master artwork; never retype a lockup.

PRIMARY LOGO

ROLE
The masterbrand at its most complete. The full name, for trust.

USE ON
Footer, Our legacy page, hoardings, billboards, corporate documents.

MINIMUM
12 mm wide in print, 40 px on screen. Below this, use the mark.

SECONDARY · JDC

Website header and navigation, letterheads, display pictures, building identification. Gap 4×.

SUB-BRANDS

JDC Select for luxury residential, **JDC Place** for commercial. Every sub-brand carries the mark.

PROJECT LOCKUP

ARISE

Sub-brand above the project name in Medium caps. Name cap height = mark height, gap 6×, left-aligned. No sub-brand? Use the JDC lockup.

THE MARK

Favicon, app icon, loader, social avatar. Alone only where the name is already present or space is very small. Min 16 px.

UNIT · X
The step between the two courses. Every logo measurement is a multiple of x.

KEYSTONE · 6X · 4X · 8.1X
Crown, base and height. Each side tapers 1x, 7.0° from vertical.

MARK · 19X × 16.2X
Proportion 1.17 : 1. Stones meet edge to edge: no gaps, gutters or outlines.

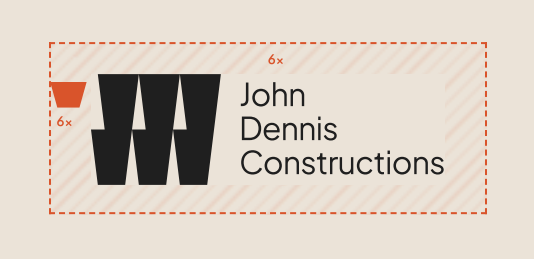
GAP TO WORDMARK
3× on the primary logo, 4× on the secondary and sub-brand lockups.

02 LOGO · USAGE

Room, size, two colours.

The logo only works if it is consistent. Give it room, never set it below its minimum, and use it only in Obsidian Concrete or Limestone Ivory, on the version that gives the strongest contrast.

CLEAR SPACE



Keep a clear zone of one keystone (6×) on every side. No type, image edge or graphic may enter it. Measure from the outer edge of the mark or wordmark.

MINIMUM SIZE

		PRINT	DIGITAL
Primary logo Not for small print or small UI		12 mm	40 px
Secondary · JDC	JDC	12 mm	40 px
Sub-brand	JDC SELECT	12 mm	40 px
Mark Favicon artwork drawn at 32 px		6 mm	16 px

Sizes are measured across the full width of the artwork. Below the primary logo's minimum, switch to the secondary logo or the mark.

COLOUR VERSIONS

JDC

Obsidian on Ivory

Default. Ivory, Sand Mist, light materials.

JDC

Ivory on Obsidian

Reversed. Obsidian, Concrete Grey, dark materials.

Ivory on dark images

Sky, shadow or glass. Add a 30–50% Obsidian scrim if needed.

Obsidian on light images

Pale facades and interiors. Contrast 3:1 or more.

MISUSE

Never alter, redraw, recolour or decorate the logo. Always use the master files.

Don't skew it | Don't tilt it | Don't stretch or squash | Don't use random colours | Don't use gradients | Don't use strokes or outlines | Don't add shadows or effects | Don't use any other font

03 COLOUR · CORE PALETTE

Stone, concrete, light.

Four quiet colours taken from the materials JDC builds with carry about 80% of every page. The sky colours are atmosphere only: hero backgrounds and photography.

PRIMARY

Limestone Ivory

Warm · natural · open

HEX	#EBE3D8
RGB	235 227 216
CMYK	0 3 8 8
Role	Default page background. Logo and type on dark.

PRIMARY

Obsidian Concrete

Grounded · precise · permanent

HEX	#1F1F1F
RGB	31 31 31
CMYK	0 0 0 88
Role	Text, logo on light, dark sections, footer.

SECONDARY

Sand Mist

Soft · tactile · calm

HEX	#D8D0C4
RGB	216 208 196
CMYK	0 4 9 15
Role	Cards, UI surfaces, alternate sections.

SECONDARY

Concrete Grey

Technical · quiet · structural

HEX	#6E6A64
RGB	110 106 100
CMYK	0 4 9 57
Role	Dividers, borders, drawings. Not for small text.

ATMOSPHERE · GOLDEN-HOUR SKY

Sky and photo only. Never for text, icons, buttons, borders or the logo.

Sky #5CACF5 · **Soft Sky** #85BAEE · **Haze** #CED9EB · **Golden Light** #F3E3C2 · **Sun Glow** #FEDEAF · **Hero sky gradient** 180deg, 0 / 34 / 60 / 82 / 100%

04 COLOUR · ACCENTS & CONTRAST

Every colour has a job.

Eight accents, about 20% of any page. Each swatch shows its job and the one text colour it may carry, tested against WCAG 2.2 AA.

SUB-BRAND	SUB-BRAND DARK	WARM SURFACE	ACTION ON DARK	MARKER	SOFT GROUND	SUCCESS	LANDSCAPE
Sea	**Deep Sea**	**Sand**	**Amber**	**Terracotta**	**Rose**	**Teal**	**Sage**
#1E5F8C	#174C70	#E8D3B5	#F2A93B	#D9542B	#E8A598	#2A8C82	#8FA77E
JDC Select. Navi Mumbai Waterfront.	JDC Select dark surfaces and text.	Warm alternative surface, cards.	Focus rings, eyebrows and CTA fill on dark. BKC ONE, JDC Place.	Keystone markers, bullets, active state, cursor. ARISE.	Soft backgrounds. Chembur Tower.	Success states and confirmations only.	Landscape, amenities, sustainability.
Aa	Aa	Aa	Aa	Aa	Aa	Aa	Aa
5.4:1 AA Ivory	7.2:1 AAA Ivory	11.3:1 AAA Obsidian	8.3:1 AAA Obsidian	4.1:1 AA large Obsidian text 24 px+ only	8.1:1 AAA Obsidian	4.1:1 AA large Icons and 24 px+ text	6.3:1 AA Obsidian

PROPORTION

80% core palette **20%** accents

One accent-coloured section per page, plus the sky hero. Accents never touch the logo.

THRESHOLDS

4.5:1	Body text and labels
3:1	Text 24 px+ (18.7 px+ bold) and UI parts
7:1	AAA, preferred for long reading

NEVER FOR SMALL TEXT

- Terracotta, Amber, Rose or Sage text on Ivory
- Any text on Terracotta below 24 px
- Text on Concrete Grey; grey text on Obsidian
- Sky colours stay in the sky: never text, icons or buttons

05 LAYOUT · GRID & RHYTHM

Fluid from 360 to 2560.

One 12-column grid that reflows at four breakpoints. Spacing scales with clamp(), so pages breathe the same way on a phone and a studio display.

BREAKPOINTS

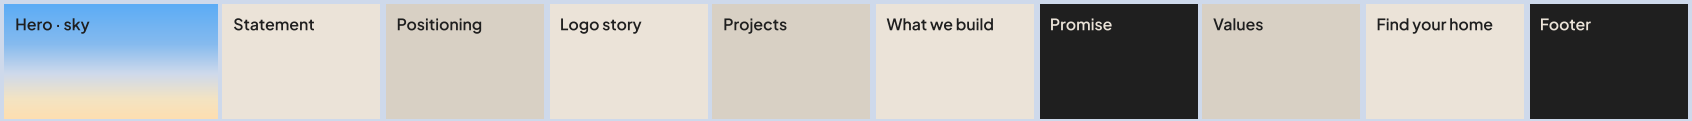
WIDTH	COLUMNS	BEHAVIOUR
360–639	4	Hero becomes 4:5 poster. Header CTA hides.
640–767	6	Arch and assemble scenes shorten.
768–899	8	Section indicator hides. Sticky columns release.
900–1199	12	Primary nav collapses into Menu below 1100.
1200+	12	Full layout. Content max 1560 px, wide 1680 px.

SPACING TOKENS

Side padding	clamp(18px, 3.4vw, 52px)
Section padding	clamp(110px, 14vh, 170px) top and bottom
Gutter	clamp(20px, 2.4vw, 36px)
Max widths	1560 content · 1680 wide · 1100 reading
Corners	0 everywhere. Shape comes from the keystone.

SECTION RHYTHM · HOME

Alternate Ivory, Sand Mist and Obsidian. One accent section per page, plus the sky hero.



06 HERO · THE WINDOW

See the city through the mark.

The campaign poster, translated to the web. One message, open sky for type, and a giant mark that reads like glass over the skyline.

1 **Full bleed.** The photo fills the viewport, slot named hero-photo for the client's golden-hour shots.

2 **Logo top-left,** about 5% inset, secondary lockup in Ivory or Obsidian by background.

3 **Campaign line** centred in the sky, top at 14% of the frame. Light 300 caps, one word Bold 700, +0.12em.

4 **Window** 72% of frame width, top at 36%. Ivory veil at 50% outside the mark; the stones show the photo untouched.

5 **Motion.** Stones set lower course first, then the line fades up. On scroll the mark scales to 3.6× and the veil thins.

6 **Mobile** crops to the 4:5 poster. The real logo is never translucent or placed on the window.

07 COMPONENTS · PROJECT CARDS

Each project has a colour.

Cards share one structure; only the accent changes. The accent marks the card, the map pin and the project hero, and nowhere else.

JDC SELECT

Navi Mumbai Waterfront

Premium waterfront residence in Navi Mumbai.

Navi Mumbai · Residential

View project →

PROJECT ACCENTS

Navi Mumbai Waterfront JDC Select	Sea #1E5F8C
BKC ONE JDC Place	Amber #F2A93B
ARISE JDC Select	Terracotta #D9542B
Chembur Tower JDC · coming soon	Rose #E8A598

Card hover: image scales 1.04 over 1.2 s and a second image fades in. Cursor label: View.

KEY DETAILS & MAHARERA

CONFIGURATIONS	1–3 BED
PAYMENT PLAN	50/50
POSSESSION	[Possession date]

MAHARERA REGISTRATION
[MahaRERA no.]
[QR]

Missing facts show as visible [brackets], never invented. Every render carries the Artist's impression tag.

Aa

Plus Jakarta Sans

One typeface for everything: headlines, body, labels and wordmarks. Geometric, open and warm, it reads precisely at 9 pt and confidently at the scale of a building.

BUTTON	SemiBold **Print** 9–10 pt / 0 **Web** 15–16 px / 0	Book a site visit →

09 VISUAL LANGUAGE · GRAPHIC ELEMENTS

The keystone, everywhere.

One shape carries the brand beyond the logo. The keystone, a trapezoid with a 14% taper, is used as a marker, a mask and a structural motif.

MARKER ABOVE HEADLINES

We were shown the slab schedule on our first visit.

34 × 24 px · Terracotta · 20 px above

BULLETS & DIVIDERS

- 1–3 BED residences
- 50/50 payment plan
- 10% on booking

14 × 10 px bullets · 18 × 12 px divider

IMAGE MASK

86 / 14 taper · portrait images

LOGO AS A WINDOW

The mark cut from a solid field to reveal the city. Teasers and launches.

SECTION INDICATOR

One stone per section; the current one in Terracotta.

CSS · mask **clip-path: polygon(0 0, 100% 0, 86% 100%, 14% 100%)** · marker **clip-path: polygon(0 0, 100% 0, 80% 100%, 20% 100%)**

ICONOGRAPHY

Drawn with one line.

22 icons on a 24 px grid with a 2 px safe area: 1.6 px stroke, round caps and joins, no fills. Scale in steps of 16 / 20 / 24 / 32 px. The same line weight as the website.

Location	Phone	Email	WhatsApp	Site visit	Brochure	Floor plan	Area	Bed	Bath	Parking
Lift	Gym	Pool	Security	Landscape	Building	Arrow	Close	Menu	Plus	Minus

Pair with labels; one colour

Mixed weights or colours

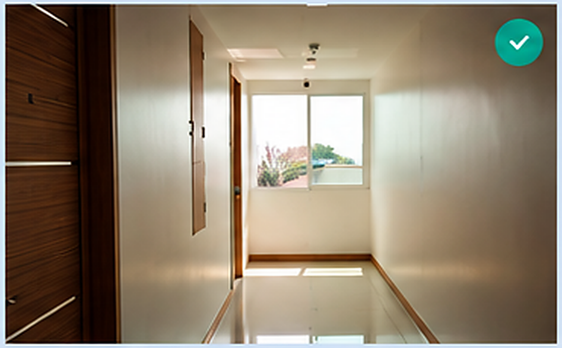
Filled or decorative icons

10 VISUAL LANGUAGE · PHOTOGRAPHY

Simple. Clean. Modern. Real.

Show good architecture, clean spaces, natural living and thoughtful construction. Not overly luxury, not too corporate. Grade to natural light and warm neutral tones, correct verticals in post, and label every render “Artist’s impression”.

LIGHT
Natural, soft, directional



Natural daylight, calm and even

TONE
Warm neutrals, gentle contrast

Straight verticals, clear subject

LINES
True verticals; the building is the subject

Warm, lived-in, real materials

MOMENTS
Real light, plants, textures, a lived-in warmth

Calm area for the logo

Over-saturated colour and luxury clichés

Stock-office corporate crowds

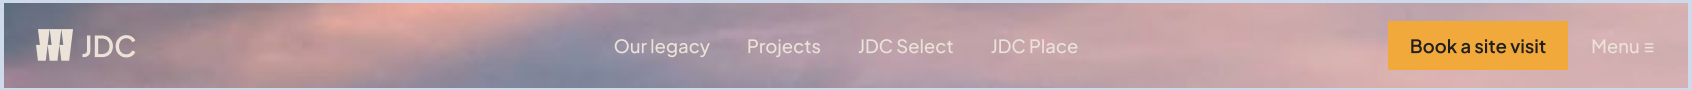
Tilted, distorted verticals

Logo over a busy background

11 NAVIGATION · HEADER & MENU

The header reads the room.

A fixed 76 px header whose ink follows the tone of the section beneath it. After the hero it turns solid Ivory with a 1 px Sand Mist rule.

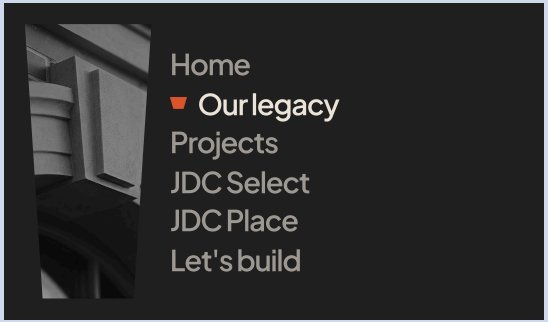


Over the hero · transparent, Ivory ink, Amber CTA with Obsidian label

After the hero · solid Ivory, Obsidian ink, active page underlined 2 px Terracotta

HEADER SPECS

Height	76 px, fixed, grid 1fr auto 1fr
Logo	Secondary lockup, mark 30 px, gap 4×
Nav links	15 px Medium, gap clamp(16px, 2.4vw, 36px)
Hover	2 px Terracotta rule grows from the left, 0.5 s
CTA	44 px button, hidden below 640 px
Tone switch	data-tone="light | dark" on every section, 0.45 s ease



FULL-SCREEN MENU

Opens with a keystone-shaped clip-path reveal, 0.85 s.

Hovering a page name shows its image in the keystone mask, with a caption.

Phone, email and Enquire now at the foot. Escape closes and returns focus to Menu.

ALTERNATE CTA

6 px corner radius

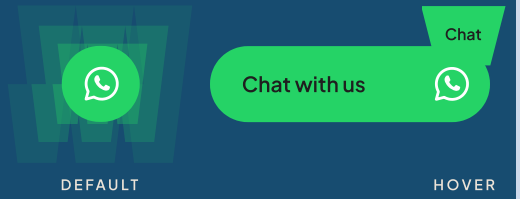
12 COMPONENTS · BUTTONS & LINKS

Square, solid, sentence case.

One primary action per view. 15–16 px SemiBold, no full stop, square corners, no shadow. On hover a small keystone slides in from the left edge in 0.35 s.

VARIANT	DEFAULT	HOVER	FOCUS	LOADING
Primary Obsidian / Ivory · 13:1	Book a site visit	Book a site visit	Book a site visit	Sending
Primary on dark Amber / Obsidian · 8.3:1	Enquire now	Enquire now	Enquire now	Sending
Outline 1 px Obsidian, fills on hover	Button	Button	Button	Button
Text link Arrow; 1 px underline on hover only	View project →	View project →	View project →	n/a

WHATSAPP FLOAT



DEFAULT HOVER

Size	58 px circle, #25D366, white glyph 30 px. The only round shape on the site.
Waves	Three JDC-mark waves grow from 0.6× to 2.6× and fade out. 3 s loop, 1 s apart.
Hover	Pill opens to 212 px in 0.5 s. "Chat with us" fades in after 0.15 s. Cursor turns green, label Chat.
Place	Bottom-right, 24 px inset. Lifts above the footer. No waves with reduced motion.

- Heights: 56 px standard, 46–48 px in rows and toggles, 44 px in the header.
- Labels are verbs: Book a site visit, Download brochure, Enquire now.
- Focus ring 2 px with 4 px offset: Obsidian on light, Amber on dark.
- No pills, rounded corners, shadows or gradients. Minimum target 44 × 44 px.

13 COMPONENTS · ENQUIRY FORM

Enquiry form.

Every lead on the site comes through one form component. Ask only what the sales team needs to call back, and confirm clearly when it's sent.

Modal · page · inline

FIELD STATES

EMPTY	FOCUS	ERROR	VALID
PHONE *	PHONE *	PHONE *	PHONE *
98200…	98200	98 20	+91 98200 00000
		At least 10 digits.	

1. **Two fields required:** name and phone. Two-column grid on every form. Underline fields, 1 px Concrete Grey; labels are 12 px caps eyebrows.
2. **Checkboxes**; pick one or both. Project is pre-filled from the page you came from.
3. **Site visit** sits beside the interest checkboxes; ticking it reveals a date picker, earliest date today.
4. **Message** is optional free text; the field grows as you type.
5. **Consent** is required. Errors show inline as red text (#D32F2F, #FF6B6B on dark), role="alert", and move focus.
6. **One button**, right-aligned below a divider. Says what happens; "Sending" while it submits.

Thank you. We have your details.

Our team will call you back on the number you shared.

VARIANTS

Full · every enquiry: modal, contact, project, Select, Place, register interest
Short · site-updates signup
Brochure gate · download after submit

14 SECTIONS · PATTERNS

Four patterns build every page.

Pages are composed from a short list of section types. Each opens the same way: keystone marker, eyebrow, headline, intro.

Section opener

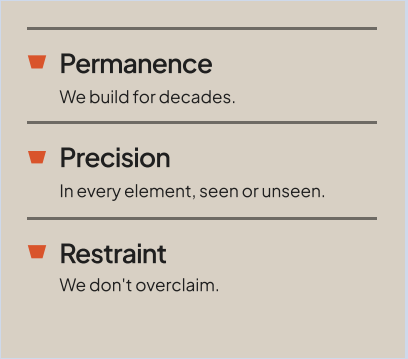
Marker 34 × 24, 20 px gap, eyebrow, H1/H2, intro. Lines rise from a mask, 80–160 ms apart.

Statement

Display size. Words light up one by one on scroll, from 14% opacity. One key word in Terracotta.

Dark statement

Obsidian ground, Amber eyebrow and highlight, Ivory text. Focus rings turn Amber.



List grid

Auto-fit grid, 1 px Concrete Grey rules, keystone bullets. Values, sectors, specifications.

15 MOTION · LAID LIKE STONE

Every move is set, not thrown.

Motion borrows from the mason: stones arrive in order, settle, and stay. Nothing bounces for attention. With reduced motion, show the final state.

MOMENT	TRIGGER	TIMING	BEHAVIOUR
Loader	First visit	0.55 s per stone, 0.14 s apart	Six stones set, lower course first; Obsidian doors part.
Page transition	Route change	0.34 s in, 0.4 s out, 35 ms stagger	Five keystone panels in the destination colour, with the mark.
Hero window	Load, then scroll	1 s set · scroll-linked	Mark scales 1 → 3.6×, veil thins, headline lifts away.
Line reveal	Enters viewport	1.1 s ease-out, 80–160 ms	Each headline line rises from 110% inside a mask.
Image reveal	Enters viewport	1.6 s ease-in-out	clip-path opens from a small keystone to the full mask.
Logo story	Scroll, 300 vh	Scroll-linked	Stones fly in and lock; counter 0 / 6 stones set.
Cursor	Fine pointers	Follow lerp 0.24	18 × 13 Terracotta keystone; grows to a labelled stone over links.
WhatsApp float	Always	3 s loop, 1 s apart	Three translucent mark-shaped waves; label slides out on hover.

EASING TOKENS

--ease-set
cubic-bezier(.2, .8, .1, 1) · reveals, hovers

--ease-mason
cubic-bezier(.7, 0, .2, 1) · panels, menu, masks

--ease-settle
cubic-bezier(.3, 1.4, .5, 1) · cursor, pins

Smooth scroll with Lenis, lerp 0.1. prefers-reduced-motion: no Lenis, no scroll scenes, no loops; final states only.

16 ACCESSIBILITY & BUILD

Built for everyone.

WCAG 2.2 AA is the floor. Every colour, size and motion rule above already meets it; these are the behaviours that complete it.

- **Skip link** to main content, first in tab order.
- **Focus ring** 2 px, 4 px offset: Obsidian on light, Amber on dark.
- **Contrast** 4.5:1 body, 3:1 for 24 px+ and UI. No small text on Terracotta or Concrete Grey.
- **Alt text** on every image; renders say Artist's impression.
- **Landmarks:** header, nav, main, footer; one H1 per page.
- **Overlays** trap focus; Escape closes and returns focus to the trigger.
- **Targets** 44 × 44 px minimum; body text never below 16 px.
- **Performance:** preload hero and font, lazy-load the rest, font-display: swap, no layout shift.
